NON-STOP SERVICE

to the INTERNET

Trying to stay competitive in today's fast paced travel industry is a real challenge. We understand and can help. By providing your agency with a cost-effective, high-speed Internet access solution from DSL.net, you'll get a direct flight to accelerated booking productivity and improved bottom line performance.

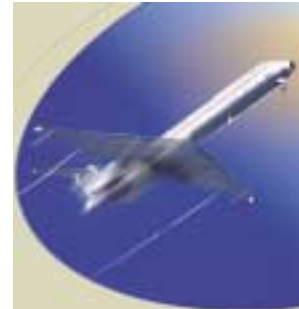

That's because we offer Internet connections with speeds up to 1.5 Mbps ---a clear alternative to conventional, often-frustrating, dial-up services and expensive ISDN, Frame Relay and T-1 connections. And, because we provide an "always-on", "always-connected" link to the Internet, you'll have immediate access to the information you need, when you need it, without experiencing busy signals or dropped calls associated with conventional services.

There's also a giant plus. With DSL.net, you get one dedicated connection for an entire network of users at uniform, flat rate monthly billing. So what are you waiting for? Take a direct flight to the Internet by calling us today!

Just one click and you're ready for take-off!

Features:

- High-speed Internet connections up to 1.5 Mbps both upstream and downstream
- Service that is "always on"- no dial-ups, no busy signals, no dropped calls
- Access that's cost-effective when compared with multiple dial-ups, Frame Relay, ISDN, and T-1 connections
- Added bandwidth to enable the use of e-commerce initiatives and web-based business applications
- Static IP addresses available for multiple user networks
- Server hosting available upon request
- Proactive 24 x 7 monitoring of our nationwide network and your DSL.net connection

Benefits:

Speed, Service & Performance

DSL.net provides SDSL service with speeds of up to 1.5 Mbps both upstream and downstream. Our flat-rate Internet access means no additional telephone company or hidden usage charges, and DSL.net provides your agency with a service level agreement which ensures that our service and equipment meet with your satisfaction.

Direct National DSL Provider

DSL.net is a national DSL provider, delivering high-speed solutions and services. We provide coast-to-coast, end-to-end solutions by selling directly to you and by providing on-going customer service and support.

Private Peering Relationships

DSL.net routes customer traffic over private networks that are less congested than many public "Pipes". These private peering relationships at the nation's largest network access points give our customers a "direct flight" to the Internet with faster connections and fewer stop-overs.

Network Operations Center and Customer Care

DSL.net's Network Operations Center (NOC) proactively monitors the entire network to ensure that our customers are receiving consistent, reliable speed and service 24 hours a day, 7 days a week.

Scalable Services Designed to Grow with Your Business

DSL.net provides value-added enhanced services that allow your business to take full advantage of our broadband connection. Optimize your capabilities through Web hosting, Enhanced E-mail, DNS management, USENET News, and a Business Solutions package that combines all of these services.
