

# Optimize Your In-House Travel Program

**As a corporate travel department, you can count on us for best-in-class travel procurement solutions**

You're serious about controlling travel costs. That's why you've chosen to manage your travel department in-house. Not only are you realizing greater control over your travel data, but you also have more flexibility in choosing suppliers and technology partners.

Make sure you select a technology partner that understands your unique needs and offers a complete set of travel procurement solutions. *Sabre*® enables lower travel costs and increased program efficiencies. Let us show you how.

***Sabre powers the majority of ARC approved CTDs including the last three winners of "CTD of the Year"***

## Maximize Savings

When it comes to finding low air fares, *Sabre* beats all other global distribution systems (GDS). A 2007 independent study has proven that we save you an average of 10% per ticket\*. And we find the lowest available fare up to 21 times more often than other GDSs.

The *Sabre* GDS also sources the broadest selection of inventory across multiple suppliers. This ensures you can secure the lowest published and negotiated rates via the most efficient marketplace. With inventory from 400+ airlines, more than 80,000 hotel properties and 25 car rental companies in one place, you'll have more control over your travel spend.

You can realize additional savings by using *GetThere*®, the industry's leading online travel procurement solution, with the *Sabre* GDS. *GetThere* provides travelers with an efficient and easy-to-use experience resulting in 41% higher global adoption rates than the industry average. Users experience a 13% reduction in air fares upon implementation.

Together, *Sabre* and *GetThere* ensure compliance with your travel and expense policies. In addition, we'll enable you to optimize your commitments with travel suppliers, and move more travel transactions online. The result: even greater savings to your bottom line.

Lower your travel costs and maximize your travel program's efficiencies. Choose to power your CTD with *Sabre*. Learn more by visiting [www.sabretravelnetwork.com](http://www.sabretravelnetwork.com). Or, email us at [ctd@sabre.com](mailto:ctd@sabre.com).

## Manage Efficiently

From efficiently managing hotel negotiations and rate auditing to traveler tracking and supplier contract monitoring, *Sabre* has leveraged our deep travel expertise to develop solutions to meet your needs.

*Bidstork*, our hotel RFP management tool, automates the RFP solicitation process, enabling the most efficient method for negotiating hotel contracts. You can even audit your negotiated rates in the GDS to ensure contracted rates are available.

And with *Sabre Traveler Security and Data Suite* you have the ability to instantly request a list of travelers by location, including key contact information during their *Sabre*-booked trips. But *Traveler Security and Data Suite* offers more than peace of mind. Use it to generate valuable reports that give you the upper hand in managing vendor performance and negotiations. You can use these reports to assess progress on meeting contract requirements and take action by moving un-ticketed travelers from non-preferred vendors.

\* Independent study conducted by Topaz International, 2006. Study based on average number of bookings (both offline and online). Full methodology details are available at [www.sabretravelnetwork.com/lowest\\_fares](http://www.sabretravelnetwork.com/lowest_fares).
