GETTHERE'S NEW COLLABORATION PORTAL OFFERING PROVIDES GREATER INTEGRATION POSSIBILITIES FOR CORPORATIONS

The GetThere Solution Combines Access to Business and Leisure Travel, Meetings and Expense Management and Social Networking Tools in One Easy-to-Use Site

SOUTHLAKE, TX – (August 6, 2010) – Sabre Travel Network today announces a series of key enhancements for GetThere's (R) (<http://www.getthere.com>) global customers. The technology consolidates the best in travel, meetings, expense and social networking solutions in a single online portal user experience.

The enhanced collaboration portal offers customers seamless integration of these business-critical capabilities, providing even more ease-of-use for employees, and driving increased productivity and cost savings for businesses. The new GetThere offering eliminates the obstacles employees currently face navigating between collaboration, travel and expense tools within their companies by centralizing access to them from one place. When combined with single sign-on, customers can seamlessly tab through to each environment securely and efficiently, thus increasing speed and productivity.

Another benefit of the new portal integration package is that customers can not only book business travel through GetThere's usability-tested and award-winning interface, but also employee-discounted leisure travel via Travelocity. For corporations eager to make travel and expense applications easier to access from each other, the new tabbed design makes accessing any business expense management system as easy as a click of a mouse. Additionally, corporations can connect their employees to each other securely and in a highly cost-effective manner by providing a proven corporate community/social network and file communication solution.

A [Sabre Travel Network](#)(R) business, GetThere is the recognized leader among large and medium-sized corporations, providing online solutions for the majority of America's 100 largest corporate travel programs and thousands of other corporations worldwide. GetThere provided the first solution that enables both corporations and agencies to shop and book

preferred collaboration assets within an online booking workflow, allowing them to easily plan travel, meeting and social networking options.

“With the rollout of the new integrated offering we have made the GetThere solution even more cost-saving oriented for businesses looking for an efficient and employee-friendly way to manage business collaboration,” said Paul Wiley, director of product marketing for GetThere. “Having travel, meetings, expense and social networking solutions in one place makes it easier for employees to be highly productive – and as collaborative as possible with each other.”

Corporations, travel management companies and media can learn more about GetThere’s collaboration offerings at <http://www.getthere.com/collaborate/>.
