# HOW IT WORKS FOR YOU

*Red Mobile Workspace* is available for download through the Apple App Store for *Sabre Connected*<sup>SM</sup> agents. It requires a second generation or later iPad running iOS6 or higher. The *Red Mobile Workspace* operates as an extension of *Sabre*<sup>®</sup> *Red*<sup>™</sup> *Workspace*, and the app is registered to an existing installation of *Red Workspace*. This allows for sharing of information and shortcuts between your iPad and office environment.

Agents can interact easily with the *Red Mobile Workspace* by using traditional commands and the touch/swipe capabilities of the iPad. Quickly access popular resources, such as *Agency eServices*, *AgentStream* and *Format Finder*, through the embedded web browser. Use the Change PCC feature to switch between PCCs. And, agents have easy access to *Sabre Profiles*.

Efficiency on the go is dramatically improved thanks to touch capabilities and gesture-based interactions. Scroll through your session history by swiping a single finger vertically on the screen. Change work areas sequentially by swiping two fingers horizontally. Modify or resend commands by simply tapping/double-tapping a previous command in the work area. And our custom-designed *Sabre* keyboard allows users to enter alpha, numeric, symbol and *Sabre*-specific characters from one keyboard.
